April 18, 1952

Dear Joshua:

Thank you for your letter of yesterday.
About the reprints: Luria has all (as far as
I know) of your older papers; the most recent
he has (so that you know which ones you did
not send yet), are:

- *- Selection of genetic recomb. with inhibitors,
etc. J.Bact.
- Streptomycin resistance, a recessive mutation,
J.Bact.
- Single cell isolations, etc. (Zelle & L.), J.Bact.
- Prevalence etc., Science 1951

I have only one reprint of yours; the one marked
with * in the above list. I'd greatly appreciate
if you could send those of which you still have
copies left, including the old ones. Thank you.

I imagine I'll see you in Boston.
Best regards,

sincerely

Joe
